

Summary of Reopening Process

Phase 1

Digitally verifiable vaccine certificate issued on PanaBIOS **or** PCR test from a laboratory verified on PanaBIOS . No advanced slot required.

Phase 2

Digitally verifiable vaccine certificate issued by PanaBIOS **or** any vaccine certificate issued in any system that can still be verifiable by PanaBIOS¹ **or** approved RDTs available in approved pharmacies and at the border in Ghana and other ECOWAS countries.²

0.1% of Vaccinated travellers randomly tested on arrival at government cost to validate vaccination effectiveness.

Review

Review of entire protocol based on hard data.

Reopening Steps

Note Verbale to ECOWAS and neighbouring countries on reopening of borders pursuant to Decision of the ECOWAS Heads of State on 8th December 2021.

Training of Immigration and Port Health officials

Security Cordons at borders to check Slots & Panacodes

Trial Run at Aflao
(Advanced slots required for all travellers to minimise congestion and allow full security control.)

Full **publicity** and public education

Review of Trial Run

Start phase 1 at 3 land borders

Phase 2 in Detail

RDT tests for unvaccinated travellers who cannot afford PCR tests.

Inclusivity

Vaccinated outbound travelers can also present their Trusted Vaccine (TV) pass generated on PanaBIOS.

Inbound travelers can also present PanaBIOS PCR TT code, PanaBIOS TV, or test on arrival with a PanaCode RDT.

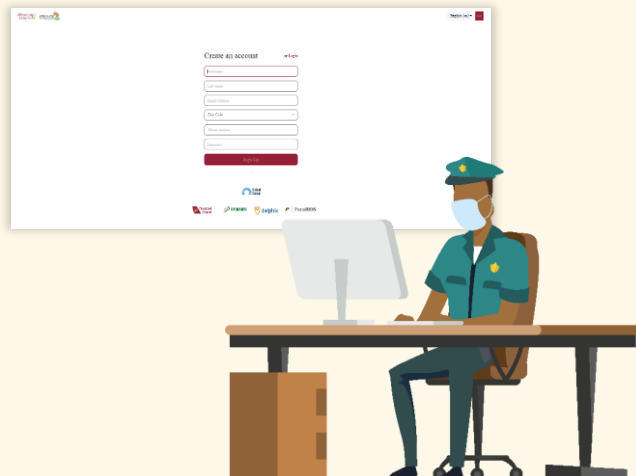

Booking a Slot for RDT test at the Border (Phase 2)

To prevent congestion at the border security cordon, travellers will need to book a slot to come to the border.

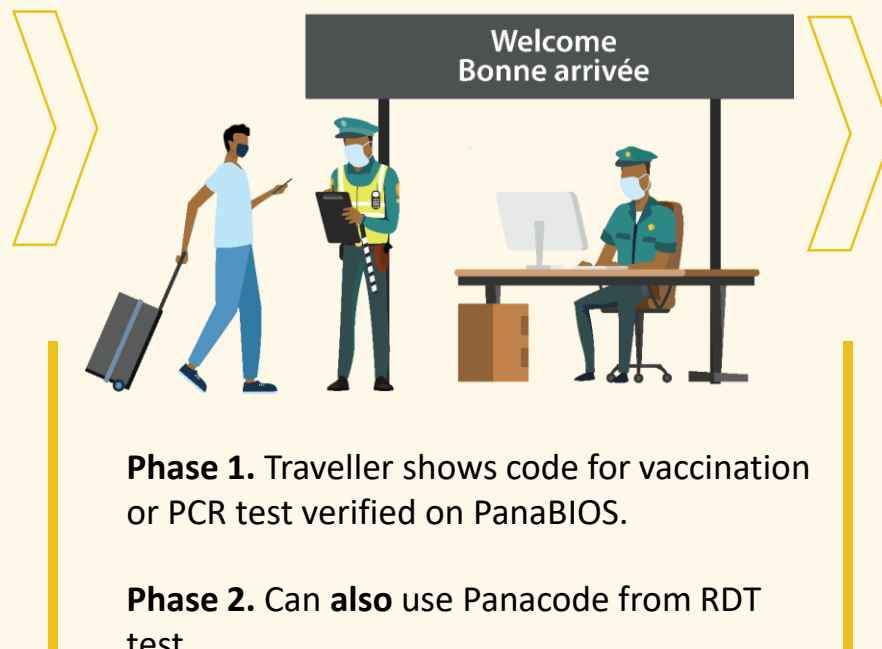

Screening at the land border

1

Training and receiving of access credentials for immigration and port health.

2

Phase 1. Traveller shows code for vaccination or PCR test verified on PanaBIOS.

Phase 2. Can **also** use Panacode from RDT test.

3

Phase 1. Officers validate PanaBIOS vaccine or PCR code.

Phase 2. Officers can also check RDT test Panacode.

A valid feedback means the traveller allowed to cross.
